

AI ASSISTED CODING LAB TEST-3

NAME : P.VIKAS

NO:2403A510E6

BATCH:05

SET:E7

QUESTION 1:

Prompt:

Scenario: In the E-commerce sector, a company faces a challenge related to algorithms with AI assistance.

Task: Use AI-assisted tools to solve a problem involving algorithms with AI assistance in this context.

Deliverables:

Submit the source code of your implemented solution.

Provide an explanation of the AI assistance used during the development process.

Include a sample output demonstrating how your algorithm solves the problem.

CODE- GENERATED:

142 rmse, prec_at_3 = evaluate_leave_one_out(products_df, ratings_df)
143 print(f"\nEvaluation (leave-one-out): RMSE = {rmse:.4f} Prec@3 = {prec_at_3:.4f}")
```

Output:

```
PS C:\Users\Anjali Jeeluka\.vscode> & "C:/Users/Anjali Jeeluka/anaconda3/python.exe" "c:/Users/Anjali Jeeluka/lab_test3.py"

Recommendations for user 1:
product_id      name      score
E      Laptop Stand 0.896753
D Noise Cancelling Headphones 0.769000

Recommendations for user 2:
product_id      name      score
B Gaming Keyboard 0.424010
E      Laptop Stand 0.270393
C      USB-C Cable 0.232286

Recommendations for user 3:
product_id      name      score
C      USB-C Cable 0.643054
A      Wireless Mouse 0.558869
D Noise Cancelling Headphones 0.000000

Recommendations for user 5:
product_id      name      score
A Wireless Mouse      9.0
E      Laptop Stand      9.0
B Gaming Keyboard      7.0
```

Observation:

The hybrid recommender system combines content-based filtering (TF-IDF) and collaborative filtering to give personalized product suggestions in ecommerce. It predicts user preferences effectively, showing good accuracy (RMSE ≈ 0.79 , Precision@3 ≈ 0.67). AI tools helped in generating and optimizing the algorithm quickly. Overall, it improves recommendation quality and user satisfaction.

QUESTION 2:

137
138
139 if __name__ == "__main__":
140     demo()

```

Output:

```
conda3/python.exe" "c:/Users/Anjali Jeeluka/que2.py"
Search results for query: wireless keyboard
- P6: Wireless Keyboard (qty=0)

Top recommendations similar to P2 (Gaming Keyboard):
- P6: Wireless Keyboard (score=0.192)

Low stock alerts (top 3 lowest quantity):
- P6: Wireless Keyboard (qty=0)
- P4: Noise Cancelling Headphones (qty=5)
- P5: Laptop Stand (qty=8)
PS C:\Users\Anjali Jeeluka\.vscode>
```

Observation:

- The AI-assisted TF-IDF algorithm correctly finds similar products (e.g., “Wireless Keyboard” is similar to “Gaming Keyboard”).
- The inverted index enables fast keyword-based search.
- The min-heap efficiently identifies low-stock products for restocking alerts.
